PROFESSIONAL EXPERIENCE

Junior Software Developer Intern: Kernet (Pty) Ltd – Somerset West, Cape Town, SA

January 2023 – Present

- I collaborated on developing a Funeral Insurance Claim Web Application using the Angular where I helped design and coded in components to capture data in input fields and save them into a Firebase Datastore and display the data on component on different pages. I submitted pull requests for my supervisor to view and accept.
- I contributed to the development of their in-house Recruitment Web Application platform in Angular for verified graduate recruitment data on their database. I was tasked to fix bugs of the User Interface and change layouts on some pages. I submitted pull requests for my supervisor to view and accept.
- Created mobile-responsive drafts for the Kernet Landing Page and a client website based on desktop designs. Designed drafts in Figma and presented demos to supervisor.

PROJECTS

Portfolio Website

<https://sonwabileit.github.io/react-portfolio-website/>

- Website displaying my profile and project list.
- Tech Stack: ReactJS, TailwindCSS.

Task Taking Web Application

<https://addtasks-app.vercel.app/>
